DESCRIPTORS: *Adhesion, *Mechanics.

Formulas expressing the relation between the stripping
angle and the load required for stripping are derived
by two different methods. The first method is based
on bending-moment equilibrium, and the second method
relies on a calculation of the work required for
stripping. The same formula was obtained by both
methods. This formula is critically examined in the
light of experimental data. A K.S. sluimeter (or yarn
tester) was modified as a stripping tester of the fixed-
(Materials--Adhesives, TT, v. 10, no. 7) (over)
